2026-2027 COURSE LISTINGS

Flexible Curriculum Solutions for
*Core Instruction, Credit Recovery,
Intervention, Virtual Programs, and CTE*

*Course offerings are continually updated.

For the most current course listings, visit SchoolsPLP.com/course-catalog.

K-12 Virtual Instruction Options

SchoolsPLP offers a turnkey virtual instruction program to assist with specialized scheduling needs. Whether the school needs a full-time online program, part-time solution, or a temporary stop-gap option, **SchoolsPLP** and our highly qualified teachers are here to help!

Standard Instruction includes

HIGHLY QUALIFIED TEACHERS

Duties include monitoring student progress, grading assignments, virtual teaching sessions as needed, and responding to messages within 24 hours (M-F).

PROGRAM COORDINATORS

Duties include encouraging the student to succeed, daily monitoring of student progress, daily messages with the student, communication with teachers and stakeholders as needed, and responding to messages within 24 hours (M-F).

SITE COORDINATORS

Duties include collaboration with on-site proctors and district staff to ensure the virtual instruction program is successful. Create plans for students who may be struggling and offer other support strategies for student success and academic achievement.

Synchronous Instruction Add-On includes

- Teacher synchronous sessions based on the district's needs. The highly qualified teacher will have regular conversations with the onsite proctor, the district staff, and students in the classroom.
- Typical synchronous sessions last one hour, with approximately 20 minutes of direct instruction and 40 minutes of independent learning time. During independent learning time, the teacher will assist individual students.

Staff Success Package

A dedicated extension of your team, all year

1:1 Support | Unlimited Training | Insight Reports

SchoolsPLP pairs your district with a dedicated **SchoolsPLP Partner Experience Specialist** who provides personalized guidance, ongoing collaboration, and expert support to help achieve your goals.

How we partner with your district

IMPLEMENTATION & LAUNCH

Guidance through implementation, platform setup, enrollments, and launch planning to build a strong foundation.

EMPOWER YOUR TEAM

Build staff confidence through unlimited virtual training and resources designed to support your team's success.

OPTIMIZE YOUR PLATFORM

Ongoing support with course setup, section management, platform configuration, and tailored daily administration.

REPORTING & INSIGHTS

Leverage reports and platform tools to monitor student progress, track activity, and gain meaningful insights.

YEAR-ROUND DEDICATED PARTNER

Your dedicated Partner Experience Specialist provides regular check-ins, resources, and trusted expertise all year.

Let's build your district's
success plan together.

S-Initial Credit Catalog

Flexible, Consistent, and Ready for Every Classroom

SchoolsPLP Initial Credit courses provide a complete first-time credit solution for students in grades 3–12. Designed for on-level learners, each course combines engaging instruction, regular assessment, and selected opportunities for students to apply, explain, and reflect on their learning.

Courses follow a consistent structure across subject areas, making them suitable for traditional classrooms, virtual programs, and blended learning environments. Lessons and assessments remain open throughout the course, while assignments and summary/reflection activities are included in Modules 3, 6, and 9 of each unit to provide meaningful demonstrations of learning without creating unnecessary grading demands.

Teachers can personalize pacing, adjust grading weights, preview hidden activities, and make additional assignments available when needed. This balanced configuration supports conceptual understanding, regular practice, and teacher flexibility while maintaining a consistent student experience.

Hidden Items (if applicable)

Pre-tests are hidden by default and do not contribute to the course grade. Assignments and summary/reflection activities outside Modules 3, 6, and 9 are also hidden. Teachers may preview or make hidden activities available any time.

NCAA & UC A-G Approved

All 9-12 grade level courses hold UC A-G and NCAA approval.

Default Weights

Weights can be adjusted to teacher’s preference. Assignments and summary/reflection are open in Modules 3, 6, and 9 only. Pre-tests are hidden by default.

S AI

S-Initial Credit AUTO GRADED Catalog

Flexible, Fully Auto-graded Learning

SchoolsPLP Initial Credit Auto Graded courses provide an on-level, first-time credit solution for students in grades 3-12. Courses are designed for grade-level learners and include engaging instruction, guided practice, quizzes, unit tests, and final assessments within a consistent course structure.

All graded coursework is computer-scored, allowing students to work independently while reducing day-to-day grading demands for teachers. Assignments and summary/reflection activities are hidden so students can complete the course without teacher-graded written work. Grades 3-5 courses also include guided notes to provide additional instructional support.

Courses may be used in traditional classrooms, virtual programs, or blended learning environments. Teachers may adjust pacing and grading weights or preview hidden activities when additional written work or demonstrations of learning are needed.

Hidden Items (if applicable)

Pre-tests, assignments, and summary/reflection activities are hidden by default. Hidden activities may be previewed or made available at any time; however, assignments and summary/reflections may require teacher grading.

Default Weights

Weights can be adjusted to teacher's preference.

S-Honors Catalog

Honors Courses for Students Ready to Go Further

SchoolsPLP Honors courses provide the highest level of rigor within the SchoolsPLP Initial Credit catalog for students in grades 9–12. Designed for advanced learners, each course includes the complete instructional experience, with all assignments and summary/reflection activities available throughout the course.

Students engage in deeper analysis, extended written responses, projects, discussions, presentations, and assessments that require them to demonstrate their learning. The consistent course structure includes lessons, assignments, summary/reflection activities, quizzes, unit tests, and a final exam.

These courses are appropriate for honors-level instruction and are NCAA approved. Teachers remain responsible for reviewing student work, providing feedback, and ensuring that local honors or NCAA requirements are met.

Hidden Items (if applicable)

Pre-tests are hidden by default and weighted at 0%. Teachers may preview or make them visible at any time. All assignments and summary/reflection activities remain open.

**NCAA & UC A-G
Approved**

All 9-12 grade level
courses hold UC A-G
and NCAA approval.

Default Weights

Weights may be adjusted to meet district, school, or teacher requirements.

GRADES 9-12

S-Accommodated Catalog

Built-In Accommodations for Flexible Learning

SchoolsPLP Accommodated courses provide an on-level learning experience for students in grades 3-12 while supporting common accommodation needs. Courses maintain the same core content and learning objectives as the corresponding Initial Credit courses, with approximately 20% fewer questions across lessons, quizzes, unit tests, and final exams.

The reduced question load helps students demonstrate understanding without unnecessary repetition. Lessons receive greater weight in the final grade, placing more emphasis on continued participation, instructional engagement, and progress throughout the course.

Courses may be used in traditional classrooms, virtual programs, or blended learning environments. Teachers may adjust pacing, grading weights, attempts, mastery thresholds, and other settings to align with individual student plans and local requirements.

Hidden Items (if applicable)

Pre-tests are hidden by default and weighted at 0%. Teachers may preview or make them visible at any time.

Default Weights

Weights can be adjusted to teacher's preference.

GRADES 6-8

Pretest	0%

S-Credit Recovery

AUTO GRADED

Catalog

Personalized Credit Recovery with Fully Automated Assessments

SchoolsPLP Auto Graded Credit Recovery courses provide an on-level credit recovery solution for students in grades 9-12. Courses are designed for students who have previously received instruction but need another opportunity to demonstrate mastery and earn credit.

Each unit begins with a pretest that identifies content the student has already mastered. When mastery is demonstrated, corresponding lessons and quizzes may be automatically excused, creating a personalized learning path focused on the student's remaining learning needs. Pretests are weighted at 0% and do not affect the final grade.

All graded coursework is computer-scored, with no assignments or summary/reflection activities required. This configuration reduces teacher grading demands while maintaining instruction, quizzes, unit tests, and a final exam to verify student understanding.

Hidden Items (if applicable)

Assignments and summary/reflection activities are hidden to maintain a fully auto-graded credit recovery experience. Pretests remain enabled at the beginning of each unit so students can demonstrate mastery and be excused from previously mastered content.

Default Weights

Weights can be adjusted to teacher's preference.

GRADES 9-12

Pretest	0%	Unit Tests	40%
Lessons	15%	Final Exam	20%
Quizzes	25%		

Unit pretests are enabled and weighted at 0%. Demonstrated mastery automatically excuses applicable lessons and quizzes, allowing students to focus on content they have not yet mastered.

S MB

S-Mastery Based AUTO GRADED Catalog

Mastery-Based Learning That Accelerates Progress

SchoolsPLP Mastery Based Auto Graded courses provide an on-level learning solution for students in grades 6-8. Courses are designed for grade-level learners who may benefit from a personalized path that allows them to move efficiently through content they have already mastered.

Each unit begins with a visible pretest that identifies existing knowledge. When students demonstrate mastery, corresponding lessons and quizzes may be automatically excused, allowing them to focus on remaining learning needs. This structure can support skill recovery, differentiated pacing, or acceleration for students ready to progress more quickly. All graded coursework is computer-scored, with no assignments or summary/reflection activities required. Students complete lessons, quizzes, unit tests, and a final exam, while teachers monitor progress and may adjust pacing or course settings as needed.

Hidden Items (if applicable)

Assignments and summary/reflection activities are hidden to maintain a fully auto-graded experience. Unit pretests remain visible and are weighted at 0% so students can demonstrate mastery before beginning each unit.

Default Weights

Weights may be adjusted to meet district, school, or teacher requirements.

GRADES 6-8

Pretest	0%	Unit Tests	40%
Lessons	15%	Final Exam	20%
Quizzes	25%		

Unit pretests are visible and weighted at 0%. Demonstrated mastery may automatically excuse applicable lessons and quizzes, making the catalog suitable for personalized pacing and acceleration.

S-Intervention Catalog

Targeted Intervention Focused on Unfinished Learning

SchoolsPLP Intervention courses provide targeted, standards-based support for students in grades 3-12. Each unit begins with a visible pretest that identifies standards and lessons the student already mastered. When mastery is demonstrated, the corresponding lessons are automatically excused, allowing students to concentrate on the content they still need to address.

Courses place a heavier emphasis on lessons and instructional engagement, giving students more time to review concepts, practice skills, and strengthen areas of unfinished learning. Quizzes are not included, reducing repeated assessment and keeping the student's focus on targeted instruction, unit mastery, and overall course progress.

Teachers can monitor student performance, review excused content, adjust pacing, and redirect students to specific lessons when additional support is needed. This configuration is appropriate for intervention programs, supplemental instruction, and individualized learning support.

Hidden Items (if applicable)

Quizzes are not included in the course configuration. Teacher guides, lab or project answer keys, and other instructional resources are hidden from students.

Default Weights

Weights can be adjusted to teacher's preference.

GRADES 6-8		GRADES 9-12	
Pretest	0%	Pretest	0%
Lessons	50%	Lessons	50%
Unit Tests	40%	Unit Tests	40%
Final Exam	10%	Final Exam	10%

Unit pretests are visible and weighted at 0%. Demonstrated mastery excuses applicable lessons so students can focus on standards that still need to be addressed. No quizzes are included, and greater weight is placed on lesson completion.

L-Synchronous Catalog

Rigorous, Teacher-Guided Learning in Manageable Steps

The L-Synchronous catalog breaks instruction into bite-sized learning objects designed for teacher-led, paced, or self-paced learning. With more than 180,000 learning objects and validated assessments, courses support frequent interaction through teacher-graded assignments, written work, and file submissions.

Courses follow a standards-aligned, backwards-design model and include multimodal activities such as Read It, Watch It, Practice It, Play It, Show It, Reinforce It, and Apply It. Many courses are NCAA approved or used as honors options.

Semester courses include 90 lessons, while year-long courses include 180. Students typically complete one lesson per day in approximately 50 minutes.

E-Career & Electives Catalog

Career Exploration Through Flexible, Future-Ready Learning

The E-Electives & College and Career Ready catalog offers more than 250 middle and high school CTE and elective courses aligned to 14 national career clusters. Courses support career exploration, STEAM, coding, summer school, enrichment, after-school programs, and differentiated learning.

Flexible course designs can be customized with additional lessons, videos, activities, and documents. Lessons may include objectives, instructional content, critical-thinking questions, labs, activities, flashcards, quizzes, discussions, and audio versions of the lesson.

Teacher resources include suggested answers, project-based learning guides, and blended-learning strategies. Most courses require only internet access and a browser, although some advanced technical courses may require higher-performance devices.

P-CTE and Electives Catalog

Career-Focused Learning Built for Industry Readiness

The P-CTE and Electives catalog offers engaging digital courses for CTE, elective, and STEM programs. Courses combine real-world concepts with interactive content, videos, discussions, activities, projects, reflections, concept checks, exams, and written assignments. Built on research-based approaches such as Understanding by Design, growth mindset, and project-based learning, each course supports student-centered learning and career-specific pathways. Text-to-speech is available throughout the catalog. Certification preparation courses, marked with a +, align directly to industry exam objectives and help students build the job-specific knowledge and skills needed for certification and future careers.

Courses Prepare Students for the Following Exams:

- Adobe Certified Professional in: After Effects, Illustrator, InDesign, Photoshop, Premiere Pro
- Autodesk Certified User in AutoCAD
- OSHA 30 Hour Construction
- FAA Part 107 Remote Pilot Certificate
- Child Development Associate (CDA)
- Entrepreneurship & Small Business Certificate
- Healthcare Management & Information Systems Associate Certificate
- Oracle Certified Associate
- LEED Green Certified Associate
- Microsoft Office Specialist in: Excel, Outlook, PowerPoint, Word
- Cisco Certified Network Associate
- Certified Associate in Project Management
- Intuit QuickBooks Certified User Online
- Social Media Strategist
- Swift Associate

C-Computer Science Catalog

Building Future-Ready Computer Science Skills

The C-Computer Science curriculum catalog offers online computer programming and digital literacy courses for middle and high school students. Developed with educators and informed by real-world technology experience, courses help students build practical skills for future college and career opportunities.

Schools can offer Java, Python, C#, HTML/CSS, Unity Game Programming, digital literacy, and introductory computer science courses. Students learn through video and text lessons, hands-on coding activities and projects, auto-scored quizzes and tests, and teacher-supported assignments. Courses also include teacher guides, activity solutions, and the option to access a text-to-speech toolbar in assessments.

Curriculum is aligned to multiple state CTE and IT standards and supports the national K-12 Computer Science Framework and CSTA K-12 Computer Science Standards.

Middle School | High School

F-Blended Catalog

Flexible Online Learning with Hands-On Assignments

The F-Blended catalog is designed for blended-learning environments that combine online instruction with printable, teacher-graded assignments. It is best suited for teachers who provide direct instruction and can evaluate subject-specific offline work.

Each lesson includes readable content, videos, examples, visuals, a printable assignment, and a computer-graded quiz. Assignments can be completed offline or submitted digitally through written responses, drawings, images, videos, charts, or file uploads.

Semester courses include a midterm in A courses and a final exam in B courses.

Hidden Items (if applicable)
Assignment Answer Keys if present

AP Courses Catalog

College Board–Approved Courses for Advanced Learning

The AP Courses catalog offers College Board–approved online courses with instructor-graded assignments, text-to-speech support, and required textbooks for select subjects. Courses are reviewed annually through the AP Course Audit process so approved offerings can appear on official school transcripts.

Students progress at a pace that supports mastery. Most courses require at least eight weeks and approximately 60 hours of work to complete successfully.

World Languages Catalog

Building Language Skills and Cultural Understanding

World language study should be an integral part of an academic program for most students. The theoretical understanding of and practical experience of knowing more than one language prepares a student for a variety of intellectual disciplines that address the complex problems of contemporary society. World language courses offered by SchoolsPLP are designed to develop students' understanding of a second culture through the language.

Four of our World Language courses offer students the opportunity to study Spanish, French, German, and Mandarin. Students enrolled in these language courses will practice the communication skills of listening, speaking, reading, and writing to develop real-world conversational and narrative skills. Students also have the opportunity to learn vocabulary and comprehension in American Sign Language (ASL). In all of these courses, students will develop interpersonal skills that foster successful interactions in a culturally diverse and linguistically rich world.

M-Mathspace

Students Learn Math Fearlessly with Support at Every Step

Mathspace delivers personalized instruction through adaptive AI, interactive textbook lessons, and continuous assessment. Each lesson identifies learning gaps, adjusts support, and helps students work toward full mastery, while quizzes, unit tests, and exams measure performance for grading. Students receive immediate guidance when misconceptions occur, encouraging productive struggle and a growth mindset. Teachers gain detailed insight into each student's learning process, making it easier to target support and focus on individual needs.

Teach Comprehensively

Engage learners with interactive lessons. Differentiate instruction with adaptive or custom tasks. Get visibility into usage and student performance with built-in activities and reporting.

C-Corinth

(formerly  lifeliqe)

Immersive 3D STEM Learning That Brings Science to Life

The C-Corinth resource offerings make it exciting to learn science. Corinth is the largest library for STEM education in 3D, Augmented and Virtual Reality, available to schools and partners in publishing and e-learning.

Our scientifically verified 3D content blends cutting-edge technology and is simple to use. Extensive visual libraries with 1,500 scientifically verified 3D models provide engaging science curriculum for elementary schools and high schools.

"Corinth has contributed a lot to my professional development as a teacher and to the personal growth of my vocational school students."

—Eva Toth, English Teacher
Lajos Vocational School

Test Prep Catalog

Preparation Course for Higher Education Goals

The ACT Preparation course, offered through BYU Independent Study, provides students with a comprehensive and flexible approach to preparing for the ACT college entrance exam. Through engaging lessons, targeted practice, and proven test-taking strategies, students strengthen the academic skills assessed on the ACT, including English, Mathematics, Reading, Science, and optional Writing. The self-paced format allows students to focus on areas needing the most improvement while building confidence and familiarity with the exam's structure and expectations.

Designed for students planning to attend college, this course emphasizes critical thinking, time management, problem-solving, and effective testing strategies that can improve performance on exam day. In addition to helping students prepare for college admissions, successful completion of the course may earn 0.5 elective high school credit through BYU Independent Study, making it a valuable opportunity to advance both academic readiness and graduation progress.

**The ACT Prep course is available at an additional cost and may be added upon request.*
