

SchoolsPLP can integrate with your PowerSchool SIS.

Auto-enrollment · Account provisioning · Grade passback to PowerTeacher Pro

Cut down the busywork.

The integration automatically manages student accounts, enrolls students in course sections, and passes grades back to PowerTeacher Pro.

We'll guide you through it.

Our integration team is hands-on with your staff during the whole project — from kickoff to first grade passback.

All-or-nothing? Of course not.

It's OK for some sections to be linked to PowerSchool and not others. Roll out at the pace that works for you.

The Timeline

- **Lead time for scheduling:**
2 weeks
- **Basic setup scheduling:**
1–3 hours of district staff time
SchoolsPLP completes setup within 3 business days.
- **Linking existing student accounts and course sections:**
Varies
Depending on the data already in SchoolsPLP, this can take little time or quite a bit.

Common questions

Which accounts are created in SchoolsPLP?

Students in PowerSchool are automatically created in SchoolsPLP the day after they're assigned to a SchoolsPLP section in PowerSchool. Staff accounts are not managed by this integration.

Are course sections created automatically in SchoolsPLP?

No. District staff create course sections in SchoolsPLP. Once a section is marked with a PowerSchool ID, the integration manages enrolling students in the section and passing grades back to PowerSchool.

Which scores are passed back from SchoolsPLP to PowerSchool?

All gradable item scores in SchoolsPLP are added to the PowerTeacher Pro gradebook. SchoolsPLP's overall course grades are sent to PowerTeacher Pro separately so it's easy to make PowerSchool grades match SchoolsPLP grades.

How quickly will SchoolsPLP grades appear in PowerSchool?

Grades appear in PowerTeacher Pro within 5 minutes of assigning a score in SchoolsPLP.

If students transfer between sections in PowerSchool, are they automatically transferred in SchoolsPLP?

Students are automatically archived in the old section and added to the new one. Existing work remains in the old section. Existing work can be transferred, but the integration won't do it automatically.

How is the data exchanged?

Secure PowerSchool plugin APIs over HTTPS. Rostering and grade passback both use authenticated, encrypted connections. No SFTP file drops required.

What about other SIS platforms?

Native integrations are also available for Infinite Campus, School Pathways, Aeries, Clever, and ClassLink. SFTP-based ingestion is supported for any SIS that can export a roster.

Ready to connect PowerSchool?
